#### [Qualitative Information regarding the Consolidated Business Result for the First Quarter of FY2005]

During the first quarter of the year ending March 31, 2006 (FY2005), the Japanese economy continued to suffer from the difficult situation begun in the second half of the previous fiscal year. However, signs exist of a real recovery with an increase in capital investment and investment in research and development due to improved corporate revenue.

In such an economic environment, the Group focused on sales to customers investing in digitizing their production (“*monozukuri*”), developing medicine for cuts and injuries, and nano-technology, for which market expansion is expected.

As a result, during the first quarter, ended June 30, 2005, sales of the Group were ¥4,400 million, operating income of ¥678 million, ordinary income of ¥710 million and net income of ¥402 million.

By business segment, the mainstay CAE solution business enjoyed overall steady progress in the automobile, precision equipment and electric-machinery-related industries and sales totaled ¥3,706 million. In contrast, sales in the network solution business were ¥693 million due to sluggish sales of operational improvement support software despite the steady advance in sales of PC connection software and security-related software following expanded demand for large-scale multipurpose equipment.
